UNIX COIN

About Unix Coin

Unix coin is Decentralized systems are commonly associated with blockchain technology, which enables peer-to-peer transactions without the need for intermediaries. UNIX COIN operates on decentralized networks where transactions are verified by a distributed network of nodes.

unix still designs UNIX smart wallet on blockchain refers to a digital wallet application built or integrated with a blockchain network. This wallet leverages the capabilities of blockchain technology to provide secure storage, management and transactions of digital assets such as cryptocurrencies and tokens.

You can swap Unix anytime

With the growing adoption of BEP-20 tokens, ensuring the security of UNIX COIN that govern them is crucial. Audits, formal verification techniques, and other security enhancements are continuously being developed and implemented to minimize the risk of vulnerabilities and exploits.
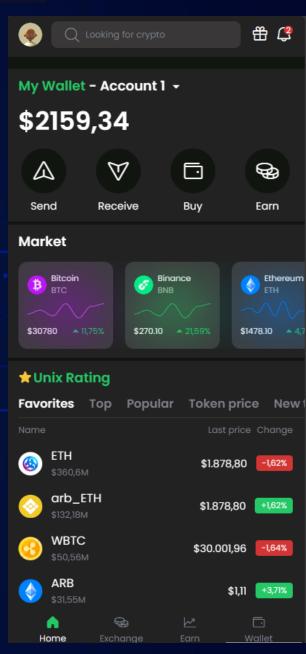

Depending on the specific implementation, UNIX smart wallets on the blockchain may offer additional features such as staking, decentralized finance (DeFi) integrations, token swaps, and more, providing users with added utility and functionality beyond basic asset management.

Wallet **Coming Soon** on play store & App store

As the UNIX Smart Wallet app becomes available for download, you can explore its features, provide feedback to the development team, and enjoy the convenience of securely managing your digital assets on UNIX Smart Wallet. Keep an eye out for the official release announcement on the Play Store and the App Store!

You can swap **Unix** anytime

# Unix Coin supply and blockchain information

Coin Information

Token Name	:	UNIX
Network	:	Binance Smart Chain (BSC)
Token Ticker	:	unix
Max Supply	:	12,500 unix
Initial Price in USD	:	$ 70

Coin Allocation

5%	:	Fee Listing CEX
5%	:	Promotion
10%	:	Development
80%	:	Public Sale

Blockchain Information

Token Contract	:	0xFF54afb5a79f4AD11f8a3726cb98E4728b7b5E1F
Decimals	:	18
Smart Contract Type	:	BEP-20
